

Safety Support Services through Welltech

TIMEC, through its Welltech Safety division, provides professional safety services and personnel ranging from high level consulting services to field based safety services. By providing dedicated hole-watch/fire-watch services to its clients, TIMEC has dramatically improved the quality and performance of this critical position on site. In addition, these personnel perform multiple tasks and significantly reduce cost for our clients.

▶ Portfolio of Safety Support Services

- ▶ Safety attendants: fire-watch, confined space attendants, fresh air attendants and ground support labor
- ▶ On-site EMT personnel and services
- ▶ Safety planning and inspection
- ▶ HAZWOPER technicians and site safety officers
- ▶ Safety, health and environmental loss control consultants
- ▶ Safety equipment

▶ Unparalleled Performance and Results

- ▶ Consistent recognition of TIMEC safety and programs by clients, the NPRA and PACE
- ▶ TIMEC's dedicated affiliate Welltech is explicitly devoted to providing safety support, training, equipment, systems, program design and management
- ▶ Welltech is recognized by its clients for its ability to effectively deploy safety support personnel, and drastically reduce the number of work-related safety incidents and OSHA violations on their sites

Welltech works hand-in-hand with its clients to customize programs and to create a safe working environment in the hazardous industries it works. Welltech assigns appropriate safety professionals to maintain the safety and integrity of the workplace.

Preferred supplier of maintenance solutions

By utilizing well-trained, safety-conscious personnel, TIMEC consistently delivers the safest, highest-quality and most cost-efficient services available. TIMEC relies on its field-proven work processes and its planning and management expertise.
